

BC Seeds Database 2008

Submitted by Lee Fuge

As the 2008 growing season quickly approaches, we would like to remind you about a great resource for finding BC-grown organic seeds:

www.bcseeds.org

www.bcseeds.org is home to the BC Seeds Database, an extensive list of BC-grown organic seeds with links directly to seed growers' websites. The database currently lists 9 of BC's organic seed growers.

You can use the database search feature to explore all the seed growers at once, with the option to search for seeds using several options:

- Common or Latin name of seed
- Variety of seed
- Description of plant
- Supplier

As the website is still under development (though the database is fully functional), we hope that you will check back often as we start to integrate new features into the site. The website will soon contain a number of articles and information about seed growing and plant breeding, plus:

- Links of interest
- Recommended Readings
- News and Events
- Interactive Seed Wiki

We hope you will be able to utilize www.bcseeds.org this season in your search for locally grown, organic seeds. Happy growing in 2008!
