

Haliburton Community Organic Farm Seedling Nursery and Farm Stand to Open in April

Submitted by Tina Baynes, Farm Coordinator - Haliburton Community Organic Farm

Our Farm Stand and Plant Nursery open on Saturday, April 19th, 11am-6pm. We offer certified organic produce such as salad greens, radishes, braising greens and green onions. A full compliment of vegetables and fruits will be available throughout the growing season, all of which is grown on the farm. Encouraged by sales last year, this year the farm stand is opening two months earlier than last year. Favorite crops last year were our salad greens, golden patty pan squash and our multi-coloured carrots.

Our new enterprise on the farm is our nursery. We are growing a large number of vegetable and flower seedlings and perennial plants for sale. Choose from a good number of tomato varieties, many Heirloom and great tasting reds, amongst the many other offerings.

Join us for a work party; learn a new skill, meet new people and enjoy the outdoors in a farm setting. Visit our web site for dates and activities www.haliburtonfarm.org.

Farm Stand and Nursery are open every Saturday and Wednesday. 11-6PM.
