

## Youth Financial Empowerment Toolkit

This Toolkit is a resource for supporting low-income and vulnerable youth in developing their financial well-being and developing a sense of empowerment for their futures.

FERN has developed this toolkit to help youth workers explore these topics interactively. We hope this curriculum will be shared widely and customized by youth workers to meet the needs of different groups of youth.

This program was developed with financial support from Coast Capital Savings Credit Union. We're very grateful to Quadra Village Community Centre's CREW Youth and the Threshold Housing Society youth who participated in the three pilot projects, from June 2014 to February 2015, that helped to shape the curriculum you see here. While we can't name all of the youth for privacy reasons, we consider them all to be co-authors of the program.

There is a lot more information about using this curriculum in the Facilitators' Guide.
